## Updated EER

Changes made to EER

1. Address listed as an entity with postal_code as its primary key. It has a 1:N relationship with USER (Address : User -> 1 : N) and total participation is required for USER.
2. Phone listed as an entity with Phone Number as its primary key. It has a 1:1 relationship with USER and total participation is required for Phone.
3. Email and password are no longer a composite attribute
4. USER and SWAP relationships removed. The attributes of the relationships can be listed under SWAP entity
5. Changed Item: Swap -> 1 : N relationship.
6. Instead of using a Type attribute under Item entity, used distinct game types as subclasses of Item with a Disjoint relationship.
